Welcome Address

Dear Doctor

It is a real pleasure to announce the MasterCourse in Heart Failure Georgia to be held in Tbilisi on September 28–30, 2023.

This course has been conceived upon the initiative of cardiologists from Georgia, Azerbaijan, Turkey and Armenia with the aim to foster medical practice in heart failure by providing education at the highest level on basic skills, as well as complex and multidisciplinary tasks that a modern heart failure doctor needs to master. The overall goal of the course is to enhance the clinical competence and know-how of participants in the diagnosis and management of heart failure, allowing them to implement the acquired expertise in their local heart failure clinics.

The MasterCourse includes state of the art lectures, panel discussions and case-based interactive breakout sessions with distinguished international opinion leaders and local experts. Participants will be able to apply the latest diagnostic and therapeutic developments in heart failure and implement the most recent Focused Update of the 2021 ESC Guidelines on Heart Failure into clinical practice.

We are looking forward to welcoming you at this prestigious meeting which will set a milestone in professional education for the benefit of your practice and your patients.

Yours sincerely,

Prof. Thomas F. Lüscher, MD
University of Zurich and
Imperial College London

Prof. Mandeep R. Mehra, MD
Brigham and Women's
Hospital, Harvard Medical
School, Boston

Prof. Zviad Kipiani, MD
