### **Heart Transplantation and LVAD Therapy: Where Are We Now and How Did We Get Here?**

given by:

**Dr. Owais Dar**

*Consultant Cardiologist, Harefield Hospital;*

*Adjunct Senior Lecturer, School of Cardiovascular Medicine and Sciences, King's College, London*

**Dr. Owais Dar** is a Consultant Cardiologist in Heart Failure, Transplant and MCS at Harefield Hospital. He is an Adjunct Senior Lecturer in the School of Cardiovascular Medicine and Sciences, King's College London.

Dr. Dar completed his specialist general cardiology training and subspecialty heart failure training in London (United Kingdom), Vienna General Hospital (Austria) and Stanford Health Care (California, USA). In Oct 2015 he took up his current post within Harefield Hospital.

Dr. Dar got his research degree from the National Heart and Lung Institute, Imperial College London, in 2010, studying the role of telemonitoring in heart failure patients. His research interests include studying non-invasive techniques in cardiac rejection diagnosis, obesity and weight loss in advanced heart failure, advanced heart failure epidemiology, and development of non-invasive cardiac output monitoring techniques.

Dr. Dar has written several book chapters and articles in peer-reviewed journals on heart failure.
